Subject: Red Hill AOC SOW Section 3 TUA, Draft Outline
[Draft AOC SOW Sect 3 Outline - 2015 01 29 Submittal.docx smime.p7s](#)

Thu and Omer,

Attached please find the draft "outline" for the Section 3, TUA report.

As you both are aware of, the Navy proactively began preparing the Section 3 report based on draft AOC SOW's and for that reason, the report is past an outline. The draft document contains information from the Tank Upgrade and Release Detection Systems and Tank Tightness Testing Study, Draft, presented to you in early August 2105, as well as comments received during the 30 November 2015 AOC SOW Scoping Meetings.

Note that we have incorporated the attribute 'Ability to obtain vendor or manufacturer guarantee' per your 15 January 2016 request, into the document. The attribute "Consistency with local policies or resolutions" is still being discussed with Navy/DLA leadership.

If you require further information, please contact me at your convenience.

Thank you
